

DESIGNER RADIATORS

DESIGNER RADIATORS
Let your imagination run wild

Hydronic heating is an efficient and superior method of heating the home and whilst the traditional steel panel radiator, which provides a classic timeless design, has been the most popular method heat outlet if you are looking for something a little more unique, a radiator that allows for style, creativity and individuality as well as outstanding performance then consider one of our latest designer radiators.

Our new collection of designer radiators is here to inspire you - considered pieces of art in themselves they allow even the most discerning client to be truly distinctive when designing your heating system and create that wow factor.

Designer radiators may look cool and like a work of art but don't be mistaken they are much more than a style statement providing an exceptional and efficient heat performance.

Designer radiators can be combined with standard steel panel radiators; in-slab heating and/or trench convectors allowing a designer radiator to become an exquisite centre piece of just one room.
